O. Johnson Taiwo, MBA

Data Scientist @ UK-ONS | Senior Data Analyst | Analytics Engineer | Data, AI & Machine Learning | Building @Mettelo
Manchester Area, United Kingdom

Summary

Most organisations don't have a data problem. They have a decision problem, too much output, not enough clarity, and analysis that sits in a deck rather than shaping what happens next. That's the gap I've spent 5+ years closing.I'm Olaoluwa J. Taiwo (OJ), a Data Scientist and Analytics Engineer who has worked across e-commerce, edtech, manufacturing, consulting, and financial services. Currently, I contribute to the production of official UK price statistics at the Office for National Statistics, building data models and analytical pipelines that inform evidence-based policy.My work sits at the intersection of science and strategy. I build the technical foundations, pipelines, models, dashboards, LookML data models, and translate what comes out into something a CFO or CMO can act on. That has meant marketing mix modelling that redirected £1M+ in budget, incrementality testing that proved 35% uplift in revenue, churn models with 85% accuracy that reduced learner dropout by 18%, and funnel analytics that contributed to ~175% online sales growth. The numbers matter, but only because the decisions behind them were better.Stack: SQL · Python · R · BigQuery · GCP · Looker/LookML · GA4 · Power BI · Git/GitLab. I hold an MBA in Business Analytics and AI, a Postgraduate Diploma in Data Science, and a CIM Level 6 in Digital Marketing, a combination that shapes how I think about data in commercial context, not just in isolation.I am also building SabiWay, a services marketplace where I own product direction, data infrastructure, and measurement architecture from the ground up. If you're working on problems where better data thinking could sharpen how decisions get made, I'd like to hear about it.

Experience

Office for National Statistics

Data Scientist – Data Science & Analytics
April 2026 - Present (7 months)
Manchester, England, United Kingdom

Contributes to the production and quality assurance of official UK price statistics within the Alternative Data Sources Division, working as part of a Data Science-led team to deliver large-scale statistical outputs using alternative data sources.

Utilises BigQuery, GCP, Looker, and LookML to support data modelling, analytical workflows, and scalable reporting solutions. Manages and maintains a portfolio of 20+ dashboards, while designing and developing new self-service reporting products to support business and analytical decision-making.

Collaborates with cross-functional stakeholders to translate complex pricing data into decision-ready insights and contributes to the division's AI working group exploring practical AI and machine learning applications across analytics workflows.

SabiWay

Founder & Product Analytics Lead - Marketplace Systems

September 2025 - Present (1 year 2 months)

Preston, England, United Kingdom

Founded SabiWay to address a persistent marketplace gap identified through data and user behaviour: customers struggle to access trusted service professionals, while skilled professionals face limited visibility and fragmented access to demand within Nigerian communities in diasporas.

Leads cross-functional execution across product, analytics, engineering, UI/UX, business analysis, and growth, aligning teams around a unified marketplace and platform vision.

Designed and implemented the platform's analytics and measurement infrastructure from the ground up, including attribution systems, funnel analytics, and growth intelligence capabilities to support scalable, data-driven decision-making.

Experience continues to deepen expertise across product analytics, marketplace systems, growth strategy, and operational leadership.

Servicesport

Analytics Manager – eCommerce, Growth & Marketing Science

August 2024 - September 2025 (1 year 2 months)

Chorley, England, United Kingdom

Led analytics across Servicesport’s digital ecosystem, overseeing infrastructure, experimentation, reporting, and decision support across marketing, product, and commercial teams.

Built scalable ETL pipelines with SQL, Python, and BigQuery, saving 20+ hours weekly in manual reporting.

Developed churn, attribution, and forecasting models that informed £500k+ in budget decisions and contributed to 175% online sales growth through funnel optimisation and experimentation.

Led marketing analytics and GTM tracking across paid, email, and organic channels to improve attribution and measurement resilience.

Partnered with leadership and cross-functional teams to standardise KPIs, streamline reporting, and embed data-driven decision-making.

The Hudson Valley Textile Company Limited
Senior Data Analyst - Business Analytics & Insights
April 2023 - January 2024 (10 months)
United Kingdom

Delivered analytics and decision support across marketing, finance, and operations. Responsible for KPI frameworks, forecasting support, and improving consistency and trust in reporting used for planning and investment decisions.

Tojmark
Senior Marketing Analyst - Marketing Intelligence & Growth
July 2021 - April 2023 (1 year 10 months)
Lagos State, Nigeria

Delivered hands-on analytics and marketing intelligence implementations for SMEs across e-commerce, fitness, education, and tech. Responsible for implementing performance measurement, attribution, and analytics pipelines, and translating data into practical actions that improved acquisition efficiency, targeting, and channel performance.

HomeTechway LTD
Data Analyst - Marketing Growth & Analytics
January 2019 - July 2021 (2 years 7 months)
Lagos, Lagos State, Nigeria

Executed technical performance analysis and data operations across digital channels to support traffic, conversion, and revenue optimisation. Built dashboards and conducted SQL and Python analysis to identify growth opportunities, supported experimentation and predictive modelling, and contributed to generating $2M+ in affiliate revenue through data-led optimisation.

SQI College of ICT

Digital Marketing Intern | Data Science & Digital Marketing Trainee
January 2017 - December 2020 (4 years)
Ogbomosho South, Oyo State, Nigeria

Launched career in digital marketing and data science through hands-on projects and dual-track training.

- Supported marketing campaigns, content creation & social media outreach.
- Applied Google Analytics, SEO & email marketing tools to live projects.
- Completed a Diploma in Data Science (Python, ML fundamentals, stats, data viz).
- Completed a Digital Marketing programme (content strategy, SEM, campaign analysis).
- Built early projects in data cleaning, EDA & predictive modelling.
- Collaborated with mentors to combine data insights & marketing strategy for campaign optimisation.
